24 WHERE WE ARE

AVK MISSION

As a global leader it is our obligation to keep pushing the boundaries of what the market can expect. In our business there are five cornerstones that must be in place in order to meet customer expectations:

- 1 QUALITY
- 2 INNOVATION
- 3 RELIABILITY
- 4 SUSTAINABILITY
- 5 CUSTOMER SERVICE

But we need to go further than that. We go further to strengthen our competitive position by exceeding our customers' needs and expectations. "Expect... AVK" means that our customers should rightfully expect us to exceed market standards and become the preferred business partner among our industry. "Expect... AVK" means to relentlessly strive for increased customer benefits!

We have three unique selling propositions to "EXPECT... AVK."

- AVK in every step
- Full line partner
- A global leader

Each unique selling proposition reflects the benefits we offer to our customers, which make AVK special. Together, these unique selling propositions form the basis on which we differentiate ourselves from the competition and underline what we can promise to our customers.

OUR UNIQUE SELLING PROPOSITIONS ENABLE US TO GIVE EIGHT IMPORTANT PROMISES TO OUR CUSTOMERS

01

EXPECT SOLUTIONS, NOT JUST PRODUCTS

It takes dedicated expertise to choose the right solution so that our customers get the highest quality at the best price.

02

EXPECT GLOBAL LEADERSHIP AND LOCAL COMMITMENT

Customers expect a partner who can combine the product portfolio and cost efficiency of a global leader with the flexibility and adaptation of a local partner.

03

EXPECT QUALITY IN EVERY STEP

Quality is essential! When it comes to valves, hydrants, fittings and accessories our customers expect long-lasting solutions.

04

EXPECT A PROMPT RESPONSE

From the customer's perspective, our valves and fittings form partial, yet vital, parts of complex installations. Therefore, our deliveries have to be punctual and our response to our customers' queries and requests timely, accurate and supportive.

05

EXPECT LASTING INNOVATIONS

To stand out from the competition, it is essential that we keep offering our customers innovative solutions that can withstand the challenges of the hardest environmental conditions.

06

EXPECT TOTAL SAVINGS

For many of our customers, it is important that we optimize our solutions to maximize their total savings.

07

EXPECT A LONG-TERM PARTNERSHIP

We build on and invest in long-term partnerships, because our customers are much more valuable than a single transaction.

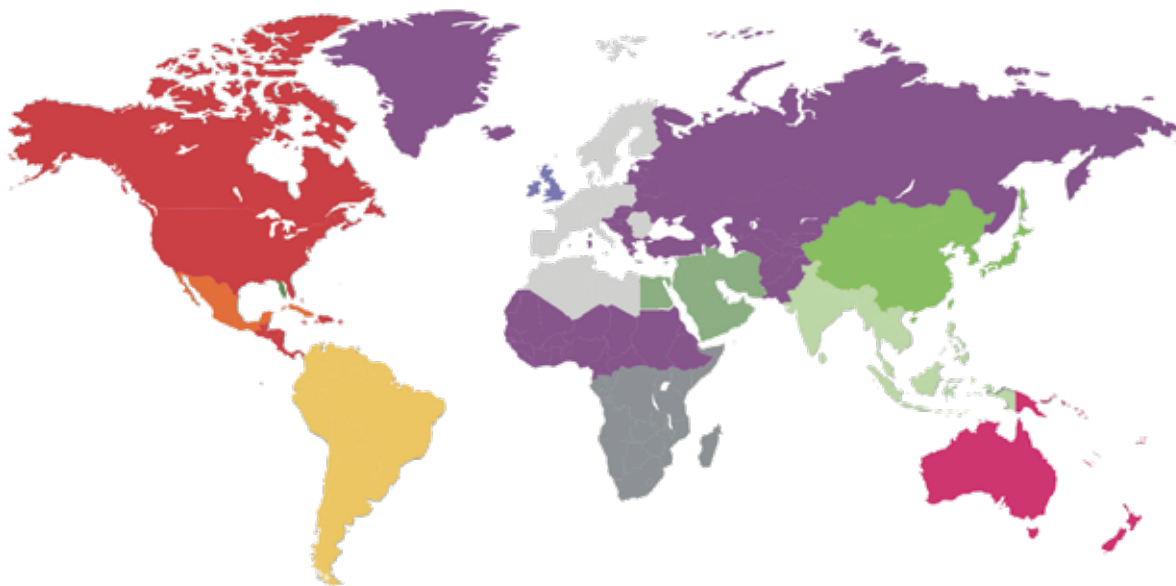

08

EXPECT IT TO BE EFFECTIVE AND EASY

Our customers need a business partner who is easy to do business with.

AVK GROUP OF COMPANIES

GLOBAL PLAYERS IN VALVE ENGINEERING

For 40 years, the Dutch company Wouter Witzel EuroValve has been a leading international manufacturer and supplier of high quality industrial butterfly valves and actuators. The products are used in pipelines as shut-off valves, control valves, and non-return valves. A full range of manual control devices, actuators, and accessories is available for specific conditions.

LEADING GLOBAL PROVIDER OF RUBBER SOLUTIONS,
QUALITY AND KNOW-HOW

AVK GUMMI A/S is a leading global provider of high performance rubber components and solutions for recognized producers of equipment for drinking water, food and healthcare as well as innovative solutions for industries with specific requirements. AVK Sealing Technology is a subsidiary to AVK GUMMI A/S.

AVK SYDDAL PROVIDES A COMPLETE RANGE OF PIPE
WORK FITTINGS

AVK Syddal provides the Water, Gas and Waste Water Utility sectors with a complete range of pipe work fittings from bespoke fabrications to simple repair clamps, through a variety of flexible service offers ranging from products supplied for emergencies in a matter of hours to programmed supply for major capital projects.

MAKING VALVE SOLUTIONS SUCCESSFUL IN MORE THAN
70 COUNTRIES

ORBINOX is one of the world's leading producers of knife gate valves and is present in more than 70 countries worldwide with over 45 years of experience designing, manufacturing, and distributing knife gate valves, penstocks, dampers, and valves for hydraulic works.

HIGH QUALITY SYNTHETIC PRODUCTS

AVK Plastics BV is specialised in producing high-grade plastic items manufactured by both low and high pressure injection moulding techniques. This process takes place in their modern, well-equipped production facility according to the latest ISO 9000 standards..

ICV VALVES FOR TOTAL CONTROL INSIDE BUILDINGS

ICV is specialised in the supply of valves, balancing valves, and other products, characterised by superior quality and outstanding durability for HVAC and the building service market.

AVK GROUP OF COMPANIES

A PIONEER IN THE ADOPTION OF POLYETHYLENE PIPE FOR GAS NETWORKS

Fusion specialises in a broad range of polyethylene electrofusion fittings and related products for the global gas and water sectors.

ONE OF THE LARGEST MANUFACTURERS VALVES PRE-DOMINANTLY FOR THE WATER INDUSTRY

Premier Valves is producing valves for bulk water, transmission and control applications. The core product offer is large butterfly valves, wedge gate and auto control valves.

ACMO IS ONE OF THE MOST IMPORTANT REFERENCE FOR THE DESIGN AND PRODUCTION OF CONTROL VALVES AND PRESSURE MANAGEMENT

ACMO group based in Italy, it designs and manufactures hydraulic equipment for water distribution, water transmission, irrigation and water treatment

EXPECT... GLOBAL LEADERSHIP

WE COMBINE THE PRODUCT PORTFOLIO AND COST EFFICIENCY OF A GLOBAL LEADER WITH THE ADAPTATION OF A LOCAL SAUDI TEAM COMMITMENT

We are dedicated to keep offering innovative solutions that will secure the AVK as the “first choice supplier” among end users throughout the world. But besides our focus on product innovation, we also focus our efforts on constantly improving our working environment performance through ongoing and detailed development plans.

Providing local people and businesses with technologically advanced solutions that may increase the quality of life and contribute to the growth of local economies are benefits of the products that the AVK offers to the market. Clean water, safe and efficient handling of wastewater and gas, and protection against fires. These are some of the benefits that we invite the world to profit from when using AVK products. Providing unique and high quality product solutions to satisfy a growing market demand is our way of making a difference in numerous business segments that have a direct impact on how modern people live today.

It also has a considerable impact on how we will leave the environment and our planet for future generations.

In AVK Saudi we are committed to our strategic plan to add a value to Saudi Arabia infrastructure:

- Increasing the local content by adding more local solution/service to our clients.
- Enhance the Saudization resources by hiring and training.

EXPECT... LOCAL COMMITMENT

AVK MEETS AN EVER CHANGING WORLD WITH GLOBAL LEADERSHIP AND LOCAL COMMITMENT

Our customers expect a partner who can combine the product portfolio and cost efficiency of a global leader with the flexibility and adaption of a local team. Our customers expect us to apply our global Know-how to offer tailor-made solutions that match specifications of their local markets and industries.

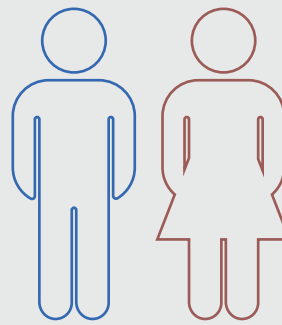

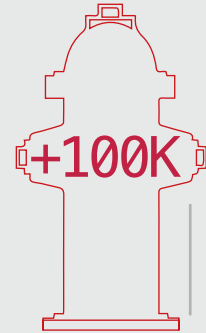

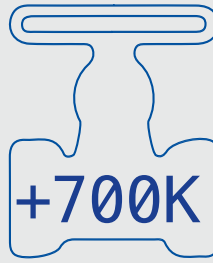

AVK Saudi aims to go beyond the expectation and empower the Saudi youth thru different training programs and challenges to be a leader in their field and lead the local initiatives.

Our geographical presence and product range may be global, but our focus is local. We stay close to our customers throughout the entire process. The proximity allows us to better understand our customers' needs and tailor our solutions to fit them.

After that, AVK started manufacturing more valves of different types and fire hydrants to be used in the industrial sector, including series 24 wet barrel hydrants and series 45 gate valves, all in accordance with ANSI & UL/FM standards. This enabled AVK SVMC to target the fast-growing oil and gas industry in Saudi Arabia. As a result, in 1999, AVK SVMC obtained an approval from ARAMCO to supply valves and fire hydrants to all its sites. In 2020, AVK SVMC obtained the ARAMCO CPA Agrerment under the IKTVA program focused on developing the energy sector and creating a world class supply chain.

LOCAL MANUFACTURING

AVK Saudi employes around hundred and fifty people with different backgrounds and nationalities. The company is determined to provide equal opportunities to both males and females that are recruited through various Saudi graduation programs.

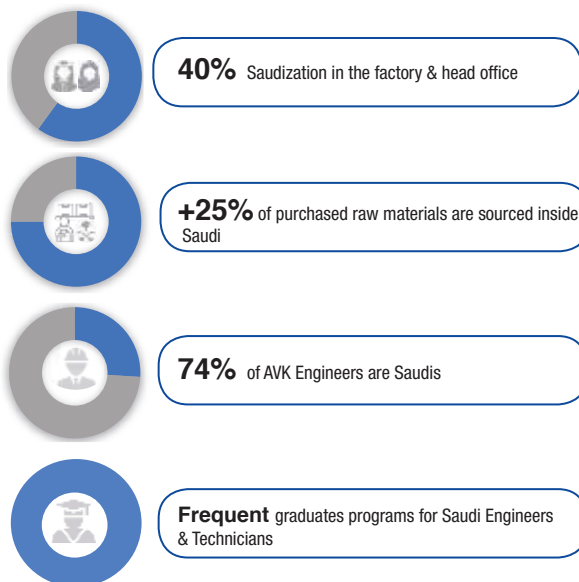

In 2014, AVK SVMC further ecpaned its Jeddah factory to boost local production capacity to meet the growing demands in the region. Over the years, AVK has manufactured more than 700,000 valves and 100,000 fire hydrants in Saudi Arabia. The production has increased yearly in line with the rapid development of the water and fire industry in the Kingdom.

Localization of fittings and Butterfly valves.
Committed to continue investment in the kingdom of Saudi Arabia.

AVK SEGMENTS

WATER SUPPLY

Products have a long life due to the high quality of design, construction, manufacturing, and materials. AVK focuses on product quality and reliability. Product program for water comprises a large range of valves, pipe fittings, and accessories available for all known pipe materials. AVK products conform to all common national and international standards, including ISO, CEN, DIN, NF, BS, GB, AWWA, JWWA, SABS, AS, and Gost.

WASTE WATER TREATMENT

Wastewater is an aggressive medium requiring a high degree of corrosion protection of products. AVK offers a wide range of products for the handling and treatment of wastewater including valves mounted with pneumatic or electric actuators as well as position indicator, resilient seated gate valves, and metal seated gate valves, knife gate valves, penstock, butterfly, and more. Moreover, AVK produces non-return valves in the form of ball or swing check valves with a number of accessories.

FIRE PROTECTION

Fire fighters must react fast and efficiently in dangerous situations, which call for a reliable water supply and fire equipment. AVK Saudi offers a wide range of hydrants, valves, post indicators, and accessories for fire protection installations. AVK hydrants are designed to comply with individual market demands and needs, focusing on reliable, fast, and efficient operation. A comprehensive range of fire hydrants and gate valves are produced in accordance with international standards.

GAS SUPPLY

Gas is an important energy source for heating, cooking, and production. The demand for safety in the gas distribution network is high. AVK has a long experience in producing valves for the gas distribution network, and AVK's products comply with the gas companies' high demands for safety, reliable operation, and long service life.

CORPORATE SOCIAL RESPONSIBILITIES

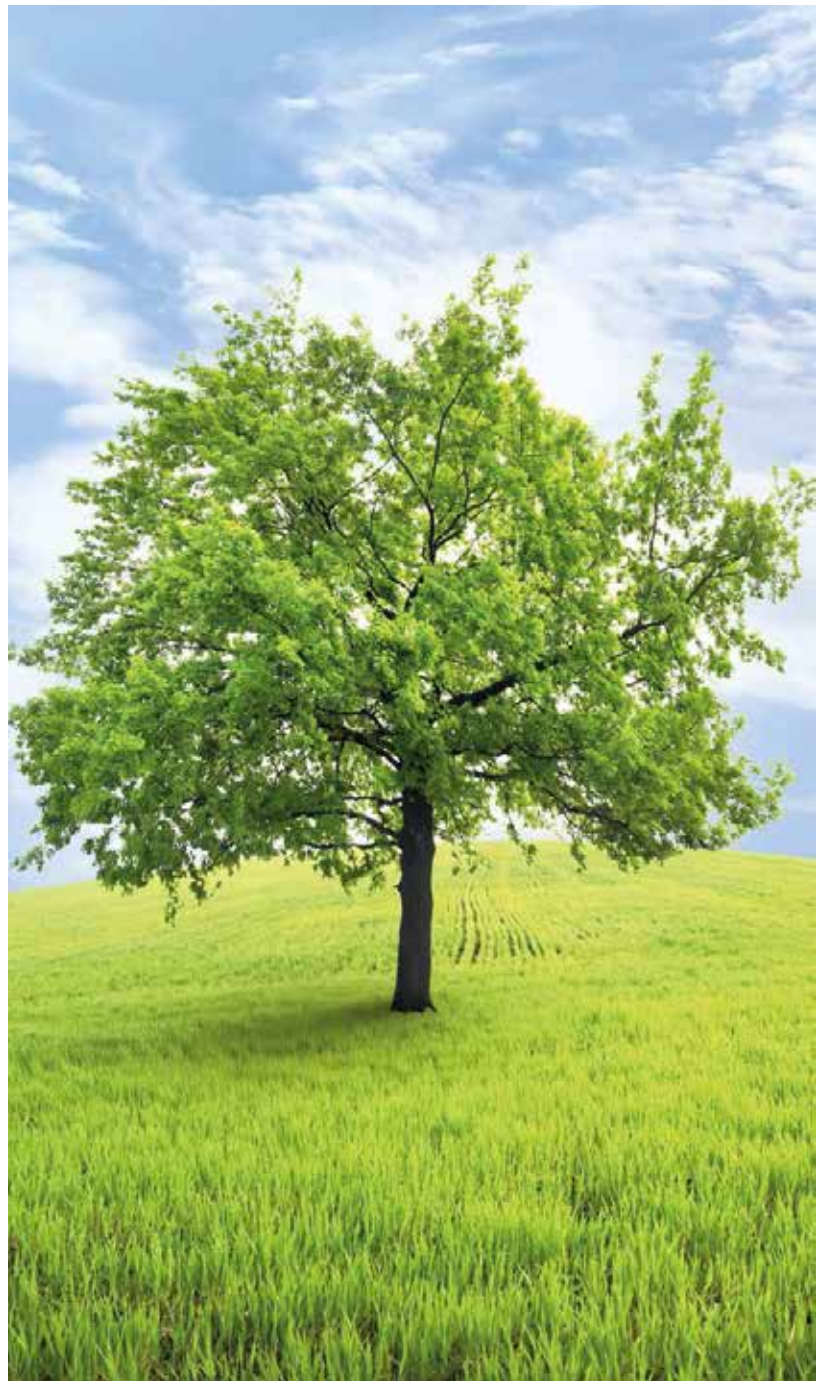

GIVEN THE NATURE OF THE BUSINESS SEGMENTS THAT AVK OPERATES IN, **WE HAVE THE POSSIBILITY AND THE OBLIGATION TO CONTRIBUTE TO THE PRESERVATION OF THE ENVIRONMENT**

Both within the water, gas, wastewater handling, and industrial segments, numerous measures may be taken to act responsibly towards the resources of nature.

AVK Group recognizes the dangers of creating a negative environmental impact when developing and exploiting business opportunities on a global scale. As a result, we are committed to constantly working on reducing this impact to a minimum by improving actions and effects that may deteriorate the resources of the earth.

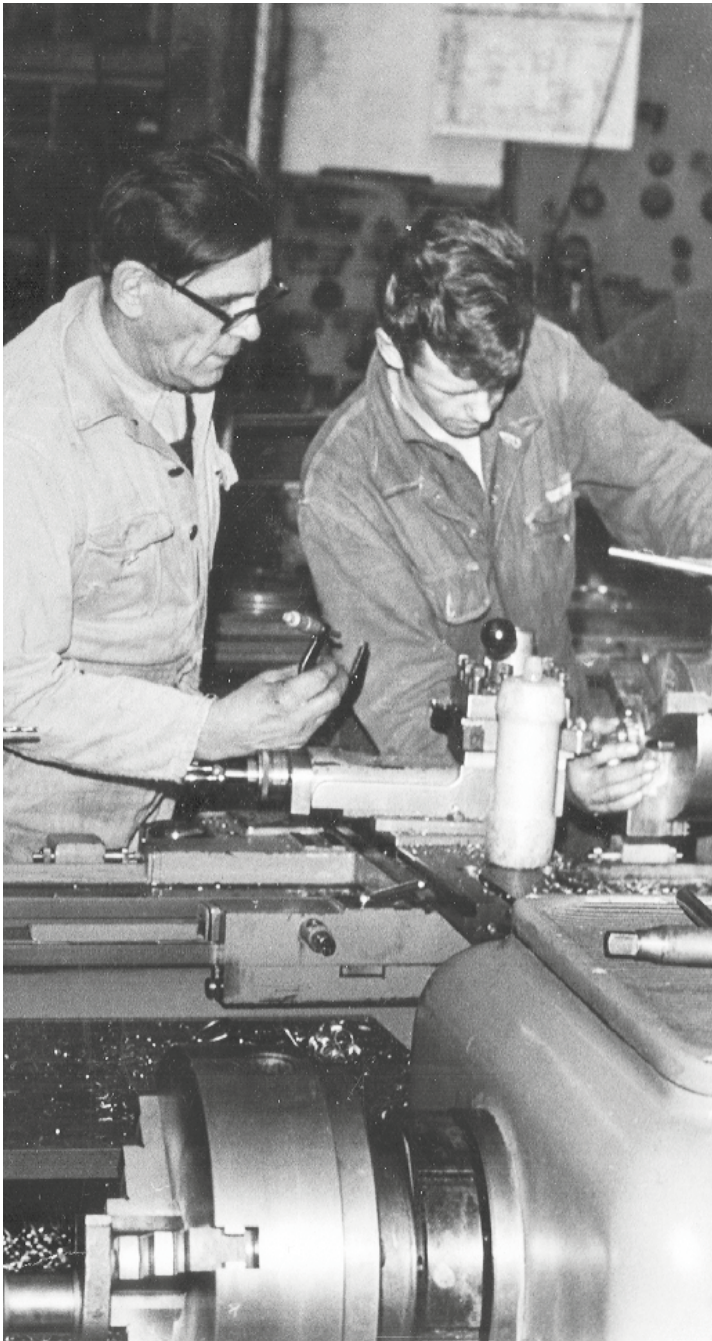

We strive at developing products that are energy saving once they are in use in water installations. All the objectives, which have been set by the AVK to actively ensure protection of the environment, reflect that the members of the AVK are responsible companies with a sound and respectful attitude towards the environment.

We are aware of the importance of reducing the electricity consumption, as it adds to the emission of CO₂. We are also aware of the fact that clean water is a scarce resource. Therefore, the AVK has outlined a number of very strict objectives for our production companies as far as electricity and water consumption are concerned.

AVK GROUP

PAST AND PRESENT

THE OVER SEVEN-DECADE STORY OF AVK IS ALL ABOUT HAVING A CLEAR VISION AND **THE DETERMINATION TO PURSUIT PERFECTION WITHOUT COMPROMISE!**

AVK was established in 1941 in the modest surrounding area of a small village named Galten in Denmark. The founder, Aage Valdemar Kjær (hence the name AVK), performed everyday plumbing and heating services in the local community. In addition to these everyday services, the company also had a minor production operation in which it produced compressors for the refrigeration industry, which mainly supplied farmers having a need for cooling the fresh milk from their cows. The guiding principles were quality, customer relations and continuity. He knew that the products were in order, and therefore he was able to offer an extensive product guarantee. In 1970, Aage Valdemar Kjær's son, Niels Aage Kjær, took over the business from his father and started to develop a resilient seated gate valve destined for the water supply segment.

Today, AVK has grown into an international group of companies. Currently we employ more than 3,400 dedicated employees around the world. The group is one of the leading valves manufacturers for the water, gas, and wastewater industries as well as fire protection worldwide. High- quality product solutions, in-depth market knowledge and continuous product development have contributed to branding the AVK Group as one of the world's leading manufacturers.

The brand names developed and owned by the **AVK Group** are thus important assets when being on the look-out for new business opportunities. The sales of the comprehensive product range, comprising valves, hydrants, fittings and accessories, is thus strongly supported by the world- famous blue AVK logo that promotes an entire series of well-known brands.

AVK SAUDI PAST AND PRESENT

AVK IN SAUDI ARABIA FOR MORE THAN THREE DECADES WITH BUSINESS EXPERIENCE AND LOCAL COMMITMENT

AVK Saudi Valves Manufacturing Co. Ltd.
(AVK SVMC) was founded in 1985 in Jeddah, Kingdom of Saudi Arabia

AVK SVMC has more than three decades of solid experience in manufacturing and supplying of valves, fire hydrants and a wide range of accessories for industrial and public utility services in Saudi Arabia. Since its establishment, the company has grown significantly and flourished successfully in the market.

It all started in 1985, when AVK SVMC established a partnership with Issa Bin Laden, a member of a family that owned and controlled one of the biggest companies in the Kingdom of Saudi Arabia. This partnership between AVK SVMC and Issa Bin Laden came to an end in 2001, when AVK bought the shares owned by Bin Laden, thus rendering AVK SVMC the sole shareholder of the company.

Throughout the 1990s, AVK SVMC diversified its production to include fire hydrants. As a result, its supply of valves, fire hydrants and accessories grew immensely in both the export market as well as the local market. Furthermore, during this time, exports to the GCC countries, neighbouring Saudi Arabia, increased. This led to an opening of an AVK office in Dubai, UAE, in 1998, in order to improve customer service in the GCC countries.

AVK SOLUTIONS

EXPRESS SERVICE

The opening of express service centres is highly appreciated and valued among AVK's customers, as they can access products with ease. In addition, AVK has service centres equipped with a knowledgeable team to ensure that customers can receive technical know-how and superior support about the range of products offered by AVK before they purchase the products. All shops contain large stock facilities equipped with various products, most of which are fast moving and emergency stock items.

MAINS TO METER

Another of AVK's focus area is providing solutions for Mains to Meter. This is also referred to as house connection, which includes all products that are used to connect the household water meter box with the public water system in the simplest possible manner. AVK Mains to Meter assortment, which is available in AVK express services, integrates all different fittings for varying scenario and solutions.

SITE SOLUTIONS

In addition to products, unlike many other companies, AVK has a service team that assists its customers, in both Saudi Arabia and overseas, in making informed decisions when selecting their choice of products based on feasibility, longevity and maintenance. This ensures that AVK stands out as a high quality supplier with a focus on the entire value chain and life cycle of their products.

INDOOR FIRE PROTECTION

Powerful protection is needed to deal with the least wanted yet one of the most disastrous situations - fires. Therefore, department stores, shopping malls, offices, hotels, airport terminals and the like are equipped with indoor fire protection that include sprinkler systems which extinguish the fire before it becomes out of control. With indoor fire protection installations, it is important to use valves and accessories of a certain quality, so that they will work effectively once needed, even after long periods of standstill. AVK's wide indoor fire protection range consists of high quality valves and accessories.

AVK SOLUTIONS

LEAKAGE SERVICE 24/7

AVK is highly focused on preserving water and ensuring that minimal water is lost through leaking transmission and pumping systems. A lot of water is lost through leakages contributing to non-revenue water and wastage of electricity. Therefore, AVK Saudi has established an experienced leakage service team who are working around the clock with the water authorities to stop water loss from leakages and provide advice for both permanent and temporary solutions. Furthermore, AVK Saudi runs a pressure management system to reduce the hidden drops in the piping system.

PRESSURE MANAGEMENT

AVK offers an effective District Metered Area system (DMA) at the design stage of a project to prevent water loss due to inaccurate design parameters or wrong selection of valves and fittings. Our DMA system allows water utilities to optimize water distributions in terms of energy consumption, pressure management and water leak indication which results in an enormous reduction amount in the Non-Revenue Water (NRW).

AVK HVAC

ICV™ (Indoor Climate Valves) is the building solution department of the AVK Group. ICV develops, produces, and markets all over the world - total valve solutions for buildings with valves produced by AVK. This includes heating ventilation and air-conditioning (HVAC), drinking and wastewater in buildings - General and manual valves - Motorized control valves - Balancing solutions ICV's balancing solutions include all balancing valves typically used for buildings with innovative solutions and durable materials.

AVK SMART

Valve Installation Tracker uses a QR code platform, designed to give full traceability of your assets, providing the data for each installed valve, and giving the opportunity to review the quality of the installation. This, combined with a unique GPS pin location and a picture of each installation, ensures that you have a complete, accurate, and auditable record of every valve installed. Furthermore, all the data recorded can be exported into standard data formats for integration into the client's existing mapping systems.

GENERAL MANAGER STATEMENT

“At AVK, we believe in combining the best of being part of one of the world’s largest international valves manufacturing companies, while at the same time being close to our customers with a local factory.”

Dear customer and business partner,

First of all, I would like to thank you for the more than 30 years we have enjoyed doing business together. It has been a fantastic journey since back in 1985 AVK established the Saudi Valves Manufacturing Company as a local factory in Jeddah to manufacture valves and fire hydrants.

We are honoured to be the first international company that established local manufacturing within our industry, and have participated in building the water and fire market in the Kingdom of Saudi Arabia. Over the years, we have grown together with you and introduced new products and solutions to the market. Every single step we have taken has been based on the fundamental AVK principle, which is to focus on providing our customers long lasting products and to never compromise on the quality. This is the reason why AVK has been approved by Aramco as a key supplier for their valves and fire hydrants for 20 years. Similarly, our products can be found in many of the strategic water and sewage projects that the Ministry of Environment, Water & Agriculture and NWC have built around the Kingdom.

At AVK, we believe in combining the best of being part of one of the world’s largest international valves manufacturing companies, while at the same time being close to our customers with a local factory. This confirms that we are able to offer a large assortment of quality products for most applications in the water, sewage, and fire segments, through our AVK Shops that are located around the Kingdom.

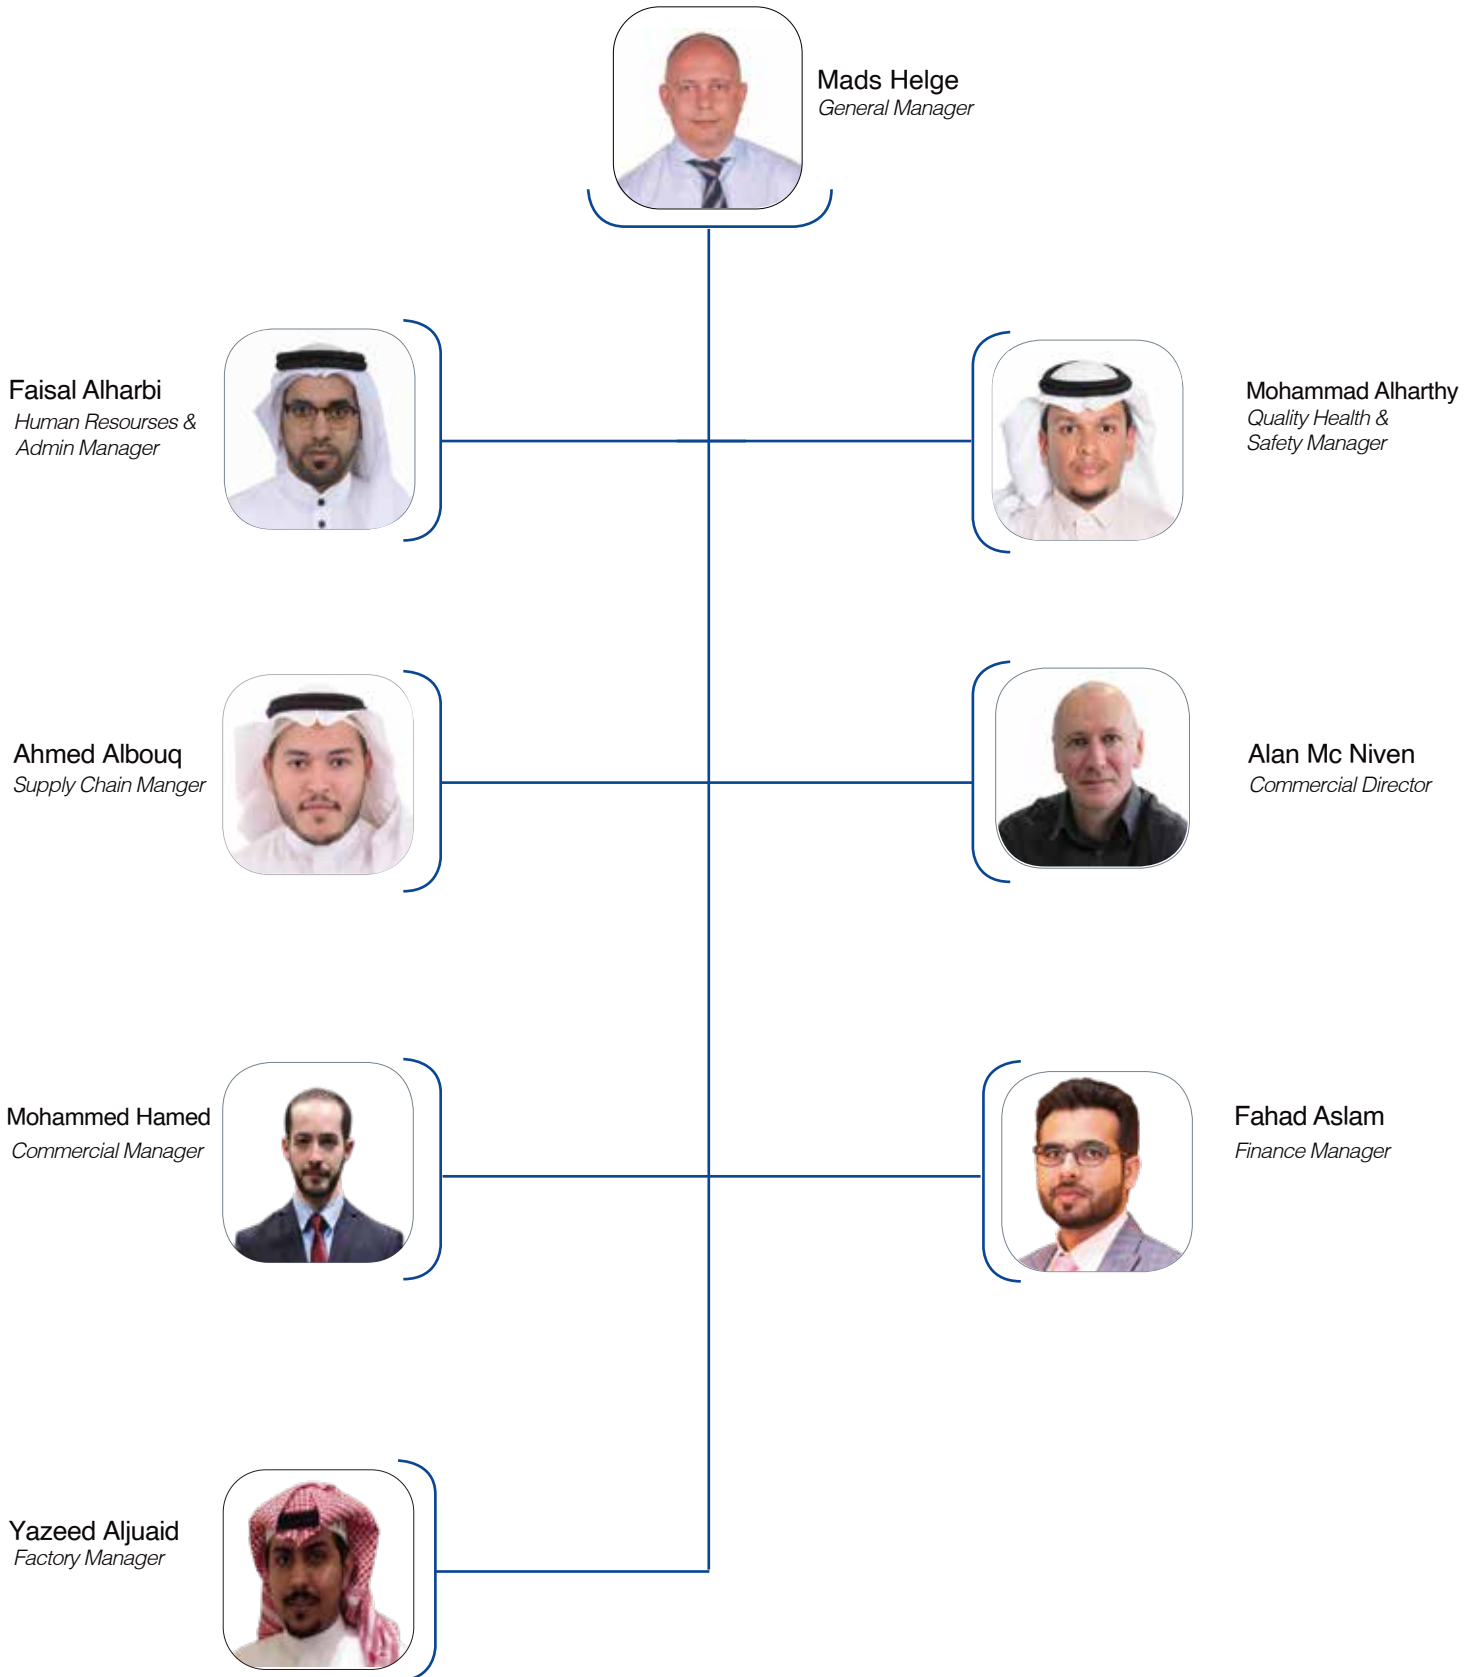

Since our entry into the Saudi market, AVK has made massive local investments in production facilities and increasing the local content in our products. Likewise, we are focusing on increasing our Saudization, by proactively hiring and developing young male and female Saudis through our graduation programs. Moving forwards, AVK is committed to continue to increase our investments locally in Saudi Arabia and play our part in the Kingdom to fulfil the 2030 vision.

I sincerely hope that we will continue this important journey together.

Mads Helge
General Manager

MANAGEMENT STRUCTURE

PRODUCTION PROCESS

01 APPROVED SUPPLIERS

The selection of sub-suppliers is based on strict investigations auditing and controls to ensure proven ability to supply materials and services in accordance with the set rules and standards required by AVK. Suppliers must meet the same criteria that applies to all AVK' production standards.

02 REGISTRATION OF INCOMING MATERIALS

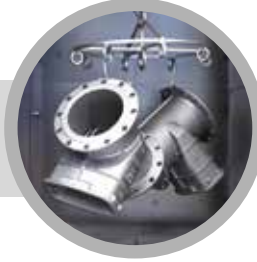

Close control of incoming materials ensures that they meet the quality demands. Through spot tests and registration of all supplied components a quality sampling of the sub-suppliers and products are made to ensure optimum efficiency and a reliable supply.

03 COMPONENTS PRODUCTION

The components are machined according to drawings with detailed control instructions. Each operator is responsible for spot testing and completion of control papers. The measurement tools are calibrated by an external supplier according to fixed procedures.

04 BLAST CLEANING

All castings are blast cleaned ensuring that any unevenness in the surface of the castings is fully cleaned. This process ensures optimum adhesion of the coating.

05 VARIETY OF COATING

The majority of valves have as standard, epoxy coating according to DIN 30677. The epoxy is applied electrostatically in an enclosed booth, where the powder melt and cures on contact with the cleaned and preheated casting. Thorough control of layer thickness, adhesive strength and impact resistance is made to ensure optimum corrosion resistance. AVK has the capability to deliver also wet epoxy for different applications & environment.

06 COMPONENTS PRODUCTION

The components are machined according to drawings with detailed control instructions. Each operator is responsible for spot testing and completion of control papers. The measurement tools are calibrated by an external supplier according to fixed procedures.

07 FINAL INSPECTION AND PACKING

Before dispatch the coating finish and item number is inspected. The valves are packed in wooden pallets with corrugated cardboard carefully placed between valves to prevent damage of the coating during transportation. For extra protection the valves can be delivered with plastic bonnet and flange protectors.

QUALITY MANAGEMENT

AVK'S MARKET LEADING DESIGN QUALITY IS BASED ON COMPREHENSIVE RESEARCH INTO CUSTOMER NEEDS AND EXPECTATIONS.

AVK is unique when it comes to High quality products. We are second to none when it comes to rubber compounds. We have our own research, vulcanization and coating facilities that enable us to deliver more durable products. Our products can withstand the harshest environmental conditions that call for the highest standards. But our quality guarantee will not end there.

Quality for AVK is not limited to the product itself. It concerns the entire process, from the early specification to the implementation and after sales. Quality is not the result of a single link in the chain – it is the sum of all steps. To deliver the best quality we must aim at delivering in every step. Because the total quality is only as strong as the weakest link.

AVK Saudi is currently certified according to ISO 14001, the international standard for environmental management. Likewise AVK Saudi is also certified to ISO 9001. In our Quality Control System, every process affecting the quality of the products or services complies with the procedures documented in our Quality Manual, just as our products are being inspected and/or tested to existing standards before leaving AVK factory. In addition, each product related to drinking water, is certified by WRAS. Likewise all products related to fire protection are certified by UL/FM.

THE OVERALL FRAMEWORK FOR QUALITY, FROM DEVELOPMENT TO DISTRIBUTION, IS OUR EXTENSIVE QUALITY ASSURANCE SYSTEM.

PRODUCT DEVELOPMENT

PRODUCT DEVELOPMENT PLAYS A KEY ROLE IN THE COMPANY'S ACTIVITIES. AS PART OF A CLEAR PRODUCT MARKET STRATEGY. **AVK'S PRODUCTS ARE CONTINUOUSLY UPDATED AND IMPROVED IN ORDER TO RAISE PERFORMANCE LEVELS AND REDUCE INSTALLATION AND OPERATING COSTS FOR THE CUSTOMER.**

In order to ensure quality products, AVK Saudi product development team works hand in hand with AVK Tech, the company's technology centre headquartered in Denmark, in manufacturing new products, tools, and processes. They also take into consideration the customer feedback, which is incorporated into improving product quality. Before the products are released to the market, they undergo rigorous testing to ensure they match the appropriate approvals needed both locally and internationally. This ensures that AVK products always match the needs of the end user by focusing on attributes such as reliability, ease of use, low maintenance and extended lifetime.

SALES AND MARKETING NETWORK

TO BRAND AND SELL AVK'S COMPREHENSIVE PRODUCT ASSORTMENT, AVK SAUDI HAS DEDICATED REPRESENTATIVES IN EACH REGION. SALES AND DISTRIBUTION ARE HANDLED DIRECTLY BY OUR REPRESENTATIVES. THIS ENABLES US TO OFFER NOT ONLY PRODUCTS OF HIGH QUALITY, BUT ALSO A GOOD SERVICE AND RELEVANT INFORMATION TO OUR END USERS LOCALLY.

Through continuous dialogue and feedback from our clients, regarding required product enhancements, the AVK representatives ensure this information is transferred back to our product development team. In addition, The AVK Product development and Marketing teams ensure that customers are equipped with all the appropriate resources, including data catalogs, data sheets, brochures, outline drawings, installation, and maintenance instructions.

Our website, www.avksvmc.com provides a valuable source of important information about product assortment, sales network, recent AVK developments, among other valuable information, which our clients can easily access. In addition, AVK Saudi provides product seminars, exhibitions, forums and factory tours to ensure that both the company's sales representatives and clients remain updated on key product programs and other initiatives.
